

WHAT IS CAREER INTELLIGENCE?

Career Intelligence™ connects career success with extraordinary leadership. For far too long the two concepts, career and leadership have been treated as separate entities. In fact, they are one and the same. If you've had success as a leader, you'll have brought purpose and passion to your career. If your career is going ahead in leaps and bounds, it will be because you know how vital your leadership impact has been.

The **Career Intelligence™ Intensive** program is the only process that honours both. You will maximise your leadership impact by building on your strengths, skills and passions as you take control of your career and create opportunities, roles and environments right for you.

PROGRAM DELIVERY

One-day Workshop

The **Career Intelligence™ Intensive** provides a structured group environment while focusing on interactive learning. The Intensive includes facilitated small group discussions, ample opportunity for networking and reflection and provides powerful processes and activities designed to clarify career aspirations and how best to activate them..

TARGET AUDIENCE

This program is for motivated individuals looking to elevate their career prospects and move to the next level – or make a career change.

CAREER INTELLIGENCE™

HAVE A SAY IN YOUR FUTURE!

Career pathways are no longer clear, defined and predictable

How would you describe your career? Thriving and successful or stuck in a rut? And, importantly, whatever your situation, where do you go from here?

Because business practices have changed and career pathways are no longer well defined it can be difficult to map out a clear cut future for yourself. However, there is a place to start. The **Career Intelligence™ Intensive** program is designed specifically for those who are genuinely motivated to further their careers and strengthen their qualities of leadership. It provides you with a unique opportunity to reflect on your current position and progress your career by creating authentic leadership impact. This strategic approach leaves nothing to chance.

The first steps in the process are straightforward. By implementing *Six Essential Elements for Career Success* you will discover a new level of self-knowledge, self-confidence and trust in yourself designed to move you ahead in your chosen career or even to take on the challenge of a new one.

Take those steps!

OUTCOMES

After taking part in the program you will :

- understand the connection between leadership ability and success;
- identify and assess your current contributions, strengths and behaviours so you can move ahead in the right direction;
- in the future, understand and seek roles and work environments that are right for you;
- tune into the organisational politics and external influences that can get in the way of your objective;
- communicate with confidence, commitment and clarity;
- draw on the *Six Essential Elements* to tailor a personalised leadership and/or career plan and put that plan into action.
- look forward to a really bright future!
